

AUTOMATIC WOOD-CHIP CARBONIZER (W.C.C.)

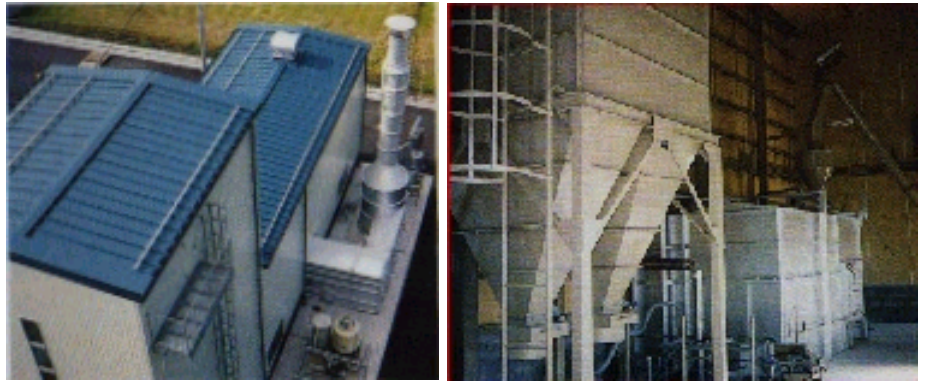

Our research upon rice-husk has been repeated for 60 years since 1941.

We succeeded in manufacturing an automatic rice-husk carbonizer in 1967 for the first time in the world following to the manufacture of our automatic rice-husk crusher. In the same year, Kansai Corporation was honored to receive the first government subsidy upon the machinery for carbonizing rice-husk under the program of Agro_Structural Improvement Project of Ministry, Agriculture Forestry and Fisheries (M.A.F.F.) of the government of Japan.

Subsequently, we Improved rice-husk carbonizer and completed wood-chip carbonizer in 1990. Our wood-chip carbonizer is improvement type of rice-husk carbonizer which is confident by long time achievements, and has many good features.

Outdoor Type W.C.C.

Indoor Type W.C.C.
